Your Specialists for  
Barcode and RFID

## About us

The SANDLAB company develops, distributes, installs and supports hardware and software, in particular in the retail, logistics and industrial sector. As a full-service provider, we provide our customers with comprehensive solutions: **IT systems** ranging from **research, development, documentation, training and integration** up to the complete **roll-out and support (24x7)**.

In doing so, we rely on a permanent team comprised of our own, qualified personnel, which can also successfully realise challenging projects at various locations in a quick, straight-forward and reliable manner for our customers.

We have been specialists for **innovative printing concepts, barcodes** and **RFID** for more than 15 years. We develop software in-house for **Microsoft™ Windows™, Linux™** and **IBM™ z/OS™ Mainframe**.

Projects are implemented throughout Germany and in neighbouring European countries from our head office in Cologne and our branch office in Berlin.

### We install for you:

- RFID equipment ▪ Firewall ▪ Server ▪ PC ▪ Receipt printer
- Label printer ▪ Network printer ▪ POS Terminals
- POS printer ▪ Tablet PC ▪ Cash register

### Our Development platforms:

- Linux ▪ Windows ▪ Host/Mainframe ▪ Client/Server
- Backend/Frontend ▪ SQL Database
- Internet/Intranet ▪ Web Development ▪ Office products

We work on projects together with our customers to develop software solutions for individual operational requirements. For this purpose we generate the **technical concept** and **detailed concept** together with our customers, before performing the subsequent **software realisation (programming)**.

Hardware      Software      Installation      Barcode      RFID

SANLAB is able to reflect back on a wealth of experience in the field of hardware and software roll-outs for major customers. Through customer-oriented planning and organisation, as well as reliable execution, SANLAB has succeeded in establishing a loyal customer base in this line of business. In addition to the pure supply of hardware, the professional integration of these systems in the existing IT infrastructure plays a major role.

We install hardware and software for our customers in Germany and the neighbouring European countries.
